

Modern and ergonomic design, absolute functionality, high quality materials and modular construction system - these are the outstanding characteristics of the new shower seat **Tabou**, by Aquabraxs. Developed in co-operation with the renowned design studio Talocci, **Tabou** is a sleek wall-mounted shower seat that complements your comfort whilst showering.

**Tabou** enhances the idea of the shower being the new spa area of the bathroom, as it allows you to sit and completely relax under rain heads, body sprays, or foot massagers. **Tabou** is also the perfect accompaniment to shaving, scrubbing feet, toes and other hard to reach areas while showering.

**Tabou** shower seat was successfully tested to the latest TÜV (independent laboratory for testings and certifications) guidelines. The materials mainly consist of aluminum and high-quality plastic, which makes it easy to care for and maintain. The ingenious hinge technology ensures excellent maximum stress of 160kg (352 pounds) and provides maximum shower area when folded against the wall.

Retailed at \$495.00 in the color white only, **Tabou** will be available in Aquabraxs official retailers in May 2010.
